1	Q	There are several evidenced informed programs on the market. Can you provide any guidance on the ones most effective here in SC?
	A	<p>There are several evidence-informed programs that are currently being implemented within South Carolina, but due to us being in the preliminary stages of completing an environmental scan and program evaluations, we cannot attest to which ones are most effective.</p> <p>Please visit the provided link(s) under the Evidence-Based or Informed Practice Resources section on our webpage to view some nationally implemented initiatives.</p> <p>We trust that prospective applicants understand the needs of their communities and will propose initiatives that best meet those needs.</p>
