

Flu Watch

MMWR Week 20: May 11, 2025 to May 17, 2025

All data are provisional and subject to change as more reports are received.

Geographic Spread

South Carolina reported **sporadic activity** this week.

Influenza Indicators

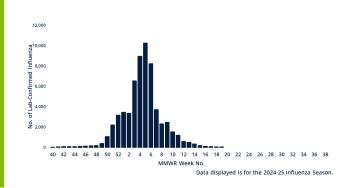

Influenza Indicator	Change from Previous Week
Lab-confirmed tests	No Change
ILI Percent	Decreased
Hospitalizations	No Change

Regional Influenza Activity Decreased No Change

No Change

Virologic Surveillance

This week **62** lab-confirmed tests were reported. In the current flu season, there have been **62,183** lab-confirmed tests reported.

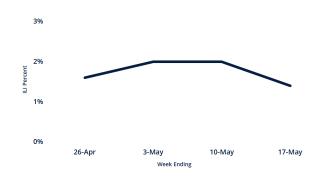

Influenza-Associated Hospitalizations

This week **10** influenza-associated hospitalizations were reported by **52** hospitals. The cumulative hospitalization rate is **162.3 per 100,000**. In the current flu season, there have been **8242** influenza-associated hospitalizations.

Influenza-Like Illness Surveillance

The percent of patient visits to sentinel providers for an influenza-like illness (ILI) was **1.4%**, which is **below** South Carolina's baseline (**3.2%**). The ILI activity level overall was **minimal**.

Influenza-Associated Deaths

This week, **0** influenza-associated deaths were reported. The cumulative mortality rate is **6.2 per 100,000**. In the current flu season, there have been **315** influenza-associated deaths.

For a description of South Carolina's influenza surveillance components and definitions go to: https://dph.sc.gov/professionals/public-health-data/fluwatch

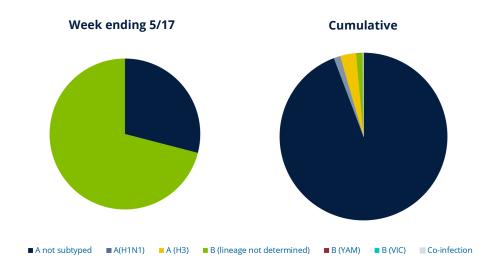

For national surveillance, please visit: https://www.cdc.gov/flu/weekly/

Baseline

-2024-25

This week, the ILI activity level was **minimal** and **1.4%** of patient visits to SC ILINet providers were attributed to an influenza-like illness. This is **below** the state baseline of **3.2%**.

Reports were received from providers in **22** counties, representing all DPH Public Health regions.

ILI percentage is dependent upon the number of reporting providers and/or can vary by disease activity or the number of providers submitting reports.
