

# Flu Watch

MMWR Week 19: May 10, 2026 to May 16, 2026

All data are provisional and subject to change as more reports are received.

## Geographic Spread

South Carolina reported **local activity** this week.

## Influenza Indicators

Influenza Indicator	Change from Previous Week
Lab-confirmed tests	Decreased
ILI Percent	No Change
Hospitalizations	No Change

## Regional Influenza Activity

Increased

No Change

No Change

No Change

## Virologic Surveillance

This week **58** lab-confirmed tests were reported. In the current flu season, there have been **31,986** lab-confirmed tests reported.

## Influenza-Associated Hospitalizations

This week **8** influenza-associated hospitalizations were reported by **61** hospitals. The cumulative hospitalization rate is **96.8 per 100,000**. In the current flu season, there have been **4,914** influenza-associated hospitalizations.

## Influenza-Like Illness Surveillance

The percent of patient visits to sentinel providers for an influenza-like illness (ILI) was **2.1%**, which is **below** South Carolina's baseline (**3.7%**). The ILI activity level overall was **minimal**.

## Influenza-Associated Deaths

This week, **no** influenza-associated deaths were reported. The cumulative mortality rate is **4.1 per 100,000**. In the current flu season, there have been **209** influenza-associated deaths.

For a description of South Carolina's influenza surveillance components and definitions go to:

<https://dph.sc.gov/professionals/public-health-data/flu-watch>

For national surveillance, please visit:

\*Data presented from previous influenza seasons represents the data from that season through the same week as the current season. Nationally, the influenza season begins with MMWR week 40 and ends with MMWR week 39. The 2025-26 influenza season began on September 28, 2025 and will end on October 3, 2026.

\*\*NS – not subtyped +LND – lineage not determined

§Cases with more than one influenza A subtype in the same sample or with influenza A and B viral types in the same sample simultaneously.

## Laboratory-Confirmed Influenza Cases, by Virus Type

Week ending 5/16

Cumulative

■ A Not Subtyped ■ A (H1N1) ■ A (H3) ■ B Lineage Not Determined ■ B Yamagata ■ B Victoria ■ Co-Infection

## Laboratory-Confirmed Influenza Cases, 2023-24 Season to Present

# Influenza-Like Illness (ILI) Surveillance

This week, the ILI activity level was **minimal** and **2.1%** of patient visits to SC ILINet providers were attributed to an influenza-like illness. This is **below** the state baseline of **3.7%**.

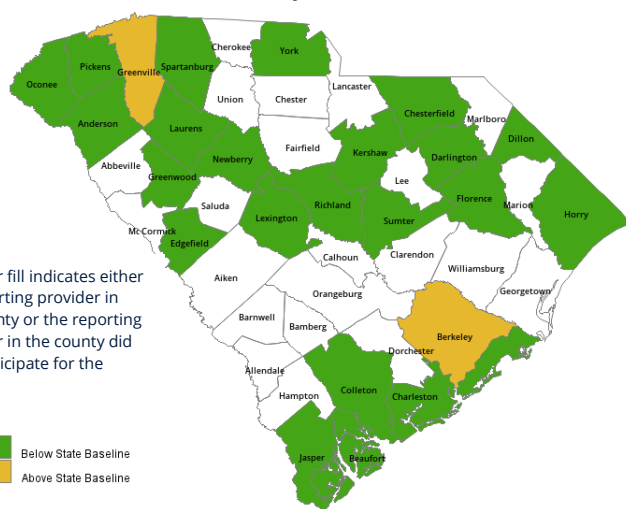

Reports were received from providers in **24** counties, representing all DPH Public Health regions.

\*\*ILI percentage is dependent upon the number of reporting providers and/or can vary by disease activity or the number of providers submitting reports.\*\*
