SOUTH CAROLINA VITAL AND MORBIDITY STATISTICS 2024

VOLUME I ANNUAL VITAL STATISTICS SERIES

**Vital Statistics
South Carolina Department of Public Health
Cayce, South Carolina 29033**

August, 2026

INTRODUCTION

This report contains vital statistics data for South Carolina events that occurred in 2024. The purpose of this report is to provide basic reference data for a variety of users. Vital Statistics certificates filed with the Bureau of Vital Statistics of the South Carolina Department of Public Health are the primary source of data presented in this report. These records include certificates of live births, deaths, marriages, divorces and annulments, and reports of fetal deaths and abortions. Data are presented for South Carolina and its 46 counties. Live births, fetal deaths and deaths occurring out-of-state to South Carolina residents are also included in this report. Event information is re-allocated to the state of residence through an agreement of interstate transcript exchange.

In 2004, South Carolina established the WebBirth system. This allows hospitals to file all birth certificate information via secured internet connection. In 2005, the WebDeath system was established. This allows funeral directors, physicians and coroners to file death certificates electronically. Fetal death reports are filed by hospitals with the Bureau of Vital Statistics. Marriage and divorce certificates are transmitted to the Office from the County Probate Court and Clerk of Court, respectively.

Population estimates for the intercensal years were provided by the National Center for Health Statistics until 2020. After 2021, population estimates are provided by the US Census Bureau.

This and other reports on South Carolina Vital Statistics are available on the internet at the web address listed below. More data are available on South Carolina Community Assessment Network (SCAN), our interactive data query application, at [SCANDPH Home Page](#).

Requests for more detailed statistical data pertaining to vital events, suggestions and comments may be submitted to:

TABLE OF CONTENTS

Section A.	Summary of Vital Events.....	1
Section B.	Population.....	7
Section C.	Birth.....	11
	Fertility Patterns.....	12
	Gender Ratio.....	17
	Multiple Births.....	18
	Attendant at Birth.....	33
	Age of Mother.....	35
	Live Births to Unmarried Mothers.....	45
	Live Births by Birthweight.....	51
	Low Weight Live Births.....	58
	Live Births by Expected Pay Source.....	76
	Live Births by BMI.....	80
Section D.	Teen Pregnancy.....	84
	Age 10-19.....	84
	Age 15-17.....	87
	Age 18-19.....	90
Section E.	Abortion.....	93
	By County of Residence.....	94
Section F.	Mortality.....	97
	Infant Mortality.....	97
	Neonatal Mortality.....	103
	Postneonatal Mortality.....	106
	Fetal Mortality.....	109
	Perinatal Mortality.....	113
	Causes of Maternal Death.....	114
Section G.	Death.....	116
	Leading Causes of Death.....	118
	Death by Age and Race.....	120
	Malignant Neoplasms by Site and Gender.....	124
	Accidental Deaths by Gender.....	125
	Death Rates by Race.....	126
	Deaths by Burial Disposition.....	130
	Deaths by Certifier.....	133
	Major Causes of Accidental Deaths.....	135
	Deaths Due to Suicide.....	137
	Deaths Due to Homicide.....	138
	Death Rates from Selected Causes by Race and Gender.....	139

TABLE OF CONTENTS (continued)

Section J.	Technical Notes.....	143
	Registration of Vital Events.....	143
	Revision of Certificates.....	144
	Allocation of Events by Residence or Occurrence.....	145
	Distribution of Malignant Neoplasms by Site and Gender.....	146
	Interpretation of Data.....	148
	Implementation of the International Classification of Diseases (ICD).....	152
	Formulae.....	153
	Grams Weight Conversion Chart.....	154
	Symbols Used in Tables.....	154
Section K .	Appendix.....	155

SUMMARY OF VITAL EVENTS

On an Average Day in South Carolina, 2024

DO YOU KNOW THAT IN 2024:

The Most Common First Names by Gender and Race for South Carolina

Male

All Races	White	Black & Other
Noah	William	Liam
Liam	James	Noah
William	John	Amir
James	Oliver	Josiah
Oliver	Noah	Legend
John	Henry	Dylan
Henry	Theodore	Elijah
Elijah	Liam	Kingston
Theodore	Thomas	Christopher
Thomas	Hudson	Isaiah
Levi	Jackson	Joshua
Jackson	Elijah	Thiago
Hudson	Levi	Elias
Asher	Samuel	Mason
Samuel	Asher	Ian

Female

All Races	White	Black & Other
Charlotte	Charlotte	Nova
Amelia	Amelia	Mia
Olivia	Olivia	Ava
Emma	Emma	Journee
Ava	Eleanor	Genesis
Elizabeth	Elizabeth	Kehlani
Sophia	Evelyn	Naomi
Evelyn	Harper	Zoe
Mia	Sophia	Chloe
Eleanor	Ava	Serenity
Harper	Sadie	Luna
Isabella	Isla	Camila
Nova	Hazel	Isabella
Scarlett	Lainey	Olivia
Isla	Riley	Sophia

BIRTHS

The month with the most births: August (5,461)
Youngest Mother: 12 years old

Least Births: February (4,488)
Oldest Mother: 50 years old

DEATHS

The month with the most deaths: January (5,449) Least deaths: June (4,641)
The oldest person that died: 110 years old

POPULATION

Figure B-1

South Carolina Census Population by County

2024

SUMMARY OF POPULATION

The estimated population of South Carolina for 2024 was 5,478,831; an increase of 105,276 from the 2023 estimated population of 5,373,555. The 2024 population showed an increase of 13.4 percent over the 2014 estimated population of 4,832,482.

Race and Age: In 2014, there were 3,343,943 white and 1,488,539 black and other persons residing in South Carolina. The 2024 estimates represent a 13.1 percent increase in the white population and a 14.1 percent increase in the black and other population. As shown below, of the ten-year population change from 2014 to 2024, the 75 and Over age group showed the greatest percentage increase. Age groups 20-24 and 45-54 showed a decrease in population from 2014 to 2024. The age distribution and the percent change in the number of residents from 2014 to 2024 are as follows:

**Table B-1.

* Includes unknown race/ethnicity

¹ Rates per 1,000 estimated population

² Data allocated to the place in South Carolina where the event occurred, regardless of the usual residence of the person involved.

FERTILITY PATTERNS

Though the crude birth rate relates the event of birth to the entire population, it does not measure the population exposed to the chance of having a birth since it is based on both sexes in population. However, the crude birth rate is an index to the relative speed at which additions are being made to a population through childbirth. When the event of birth is related to the population exposed at risk, that is, to females of childbearing ages 15-44, a more specific rate is completed.

Table C-5.
Fertility Rates* by Race: South Carolina, 2010-2024
(Residence Data)

Year	Total	Non-Hispanic White	Non-Hispanic Black & Other	Hispanic

GENDER RATIO

Out of the total 58,768 live births occurring to South Carolina residents in 2024, male births numbered 30,025 and female births numbered 28,743 giving a ratio of 104.5 males per 100 females. Table C-7 shows the ratio of males to females for the past five years.

Table C-7.
Gender Ratio of Males per 100 Females
South Carolina, 2020-2024
(Residence Data)

Year	Total	Non-Hispanic White	Non-Hispanic Black & Other	Hispanic
2020	103.9	105.8	101.8	100.1
2021	103.8	103.4	103.9	106.3
2022	103.8	105.1	102.3	101.7
2023	105.0	104.6	104.9	107.2
2024	104.5	104.8	103.2	105.7

MULTIPLE BIRTHS

Of the 1,835 multiple live births in 2024, 1,805 were twins (not sets). These figures result in a ratio of 1 multiple birth per 31.2 live births.

ATTENDANT AT BIRTH

Of the 54,752 occurrent births, physicians attended 93.3 percent. The term “physician” includes osteopaths, residents, interns and externs. Midwives attended 5.8 percent of the total births, Other and unknown attendant accounted for 0.9 percent of the total births. The term “other” includes any specific attendant other than physician, midwife or self-attended, such as a friend or relative, EMT, RN, PA, etc. Included in the “Unknown” category are Not specified or Not classifiable attendants.

AGE OF MOTHER

In 2024, there were 44 live births to resident mothers under 15 years of age and 99 births to resident mothers 45 years of age and over. As shown in Table C-16, women aged 15-44 years were responsible for 99.8 percent of all live births. In 1980, the median age of mothers was 23.8 years. The median age for 2024 is 29. The youngest mother to give birth in 2024 was 12 years old and the oldest was 50 years old.

LIVE BIRTHS TO UNMARRIED MOTHERS

In 2024, there were 26,147 live births to resident unmarried mothers in South Carolina, representing 44.5 percent of all live births. As in the past, live births to unmarried mothers occurred more frequently among young mothers. As shown in Table C-20, females under age 20 accounted for 11.1 percent of all live births to unmarried mothers in 2024.

Table C-20.
Percent Distribution of Live Births to Unmarried Mothers by Age
South Carolina, 2020-2024
(Residence Data)

Age of Mother	2020	2021	2022	2023	2024
All Ages	100.0	100.0	100.0	100.0	100.0
Under 15 Years	0.1	0.2	0.2	0.1	0.2
15-19 Years	11.1	10.7	10.4	10.7	10.9
20-24 Years	33.5	32.8	32.6	31.4	31.0
25-29 Years	28.9	28.6	27.9	27.6	27.7
30 Years and Older	26.4	27.7	28.9	30.1	30.2

LIVE BIRTHS BY BIRTHWEIGHT

Birthweight distribution by race reveals racial differences. For both races, the highest percentage of births weighed between 3,000-3,499 grams. However, the median birthweight for non-hispanic whites was the greatest, followed by hispanic and non-hispanic black and other. Figure C-7 illustrates the birthweight distribution by race.

Table C-23.
Live Births by Birthweight Groups by Race of Mother:
South Carolina, 2024
(Residence Data)

Weight Group	Total		Non-Hispanic White		Non-Hispanic Black & Other		Hispanic	
	Number	Percent	Number	Percent	Number	Percent	Number	Percent
Total	58,768	100.0	32,336	100.0	17,417	100.0	8,893	100.0
Less Than 2,500 grams	5,716	9.7	2,322	7.2	2,760	15.8	620	7.0

LOW WEIGHT LIVE BIRTHS

Live births under 5 pounds 8 ounces or less than 2,500 grams are characterized as low weight live births. Low weight live births accounted for 9.7 percent of the 58,768 resident births in 2024. In relation to age of mother, low weight births were comparatively frequent among very young mothers. In year 2024, 13.6 percent of all lives births to mothers under 15 were low birth weight. Only 9.0 percent of all live births to mothers 25-34 were low weight.

¹ Reported pregnancies equal total live births plus abortions plus reported fetal deaths.

² Reported pregnancies, Live Births and Abortions: Rates calculated per 1,000 female population

³ Fetal Deaths: Rates calculated per 1,000 deliveries

⁴ Live Births to Unmarried Mothers: Percentage represents percent of all live births to unmarried females age 10-19

* Includes unknown race

¹ Reported pregnancies equal total live births plus abortions plus reported fetal deaths.

² Reported pregnancies, Live Births and Abortions: Rates calculated per 1,000 female population

³ Fetal Deaths: Rates calculated per 1,000 deliveries

⁴ Live Births to Unmarried Mothers: Percentage represents percent of all live births to unmarried females age 18-19

TECHNICAL NOTES

REGISTRATION OF VITAL EVENTS

The vital statistics system in South Carolina is a local-state-national reporting system where the vital event certificates and reports can be submitted to Vital Records offices across the state or submitted electronically depending on the event. There are now electronic systems in place for registration of both births and deaths. The systems allow source document providers (delivering facilities, funeral directors, physicians, coroners, etc.) to enter information regarding the vital event into a web-based electronic system called the Vital Records and Statistics Integrated Information System (VRSIIS). Paper reports are sent by regional vital records staff to the State Office of Vital Statistics. The State Office performs quality assurance testing on the records and also provides certifications of records for the general public. This office also provides data to the National Center for Health Statistics in cooperation with other states in order to produce national information on vital statistics.

Statewide legislation requiring the registration of births and deaths became effective January 1, 1915. South Carolina was admitted into the National Death Registration Area in 1916 and in the National Birth Registration Area in 1919. After failing to meet the completeness of registration tests, the state was excluded from both in 1925. On the basis of later tests, South Carolina was readmitted into the National Birth and Death Registration Areas in 1928.

Marriage records have been filed with the South Carolina Department of Health and Environmental Control since July 1950. The reporting form prevented the state from being admitted as a Marriage Registration Area (MRA) in the national system until legislation was enacted in 1970 to standardize the reporting form, which enabled the state to be admitted as a MRA in 1971.

Reports of divorces and annulments have been filed with the South Carolina Department of Health and Environmental Control since July 1962. The reporting of these events reached 90 percent completeness in 1971, which enabled the state to qualify as a Divorce Registration Area.

No thorough study of the completeness of fetal death registration in South Carolina has yet been made. While the law requires that the death of any fetus that weighs 350 grams or more or, if weight is unknown, has advanced beyond the 20th week of gestation to be registered, it is believed that registration is notably incomplete. The registration of fetal deaths will continue to improve as the need for these data are shown through health research.

REVISION OF CERTIFICATES

The Office of Public Health Statistics and Information Services revised its certificates of birth certificate, death certificate, report of fetal death and report of induced termination of pregnancy based on standards set forth by the National Center for Health Statistics.

The 1989 revised vital records forms were major departures from the previous revisions (see appendix). While many of the items needed for legal purposes (e.g., name) remained unchanged or slightly modified, there were major and significant changes in the Confidential Information for Medical and Health Use section of the Certificate of Live Birth. Most of the changes represented efforts to clarify items for more complete and accurate data reporting. Other than the increased length of the revised forms, the most obvious change on the Certificate of Live Birth and Report of Fetal Death is the replacement of the open-ended medical items with items having a checkbox format. The concept of checkboxes as a mechanism for capturing information on medical factors is not new. In fact, this format was successfully implemented in several states with the previous revision of the forms. Additionally, the lists of risk factors, complications of labor and/or delivery and abnormal conditions of the newborn are taken from the Hollister Maternal/Newborn Record System, which is widely used in many obstetric offices.

The certificate of birth was revised again in January 2004 (referenced by the National Center for Health Statistics (NCHS) as the 2003 revision). This revision accompanied the implementation of a web-based electronic birth registration system (WebBirth). Substantial changes were made to the medical portion of the certificate, including removal of 'other' check/box items and the addition of section names. Several items were added to address data collection needs and to facilitate the linkage of data sets. Another change was the implementation of standardized worksheets to improve the completeness and quality of birth data.

The certificate of death was revised in January 2005 (referenced by the National Center for Health Statistics (NCHS) as the 2003 revision). The form increased in size from letter size to legal size to accommodate additional items and an expanded check box format for decedent's education, race and Hispanic origin. This revision accompanied the implementation of a web-based electronic death registration system (WebDeath). This was the first electronic death registration system in SC. In previous years, all death certificates were filed using only paper forms.

These revisions to the vital records forms and systems were intended to make the vital statistics system more responsive to public health concerns for high quality data.

ALLOCATIONS OF EVENTS BY RESIDENCE OR OCCURRENCE

With respect to geographic allocation of vital events, the data may be compiled either by place of residence or by place of occurrence.

RESIDENCE DATA are allocated in the place in South Carolina where the person normally resided regardless of where the event occurred. A cooperative system of interstate exchange of transcripts of birth and death records permits events occurring to South Carolina residents in other states to be included in the South Carolina resident tabulations. In these tabulations, births are allocated to the county of the mother's residence and deaths are allocated of the county of residence of the decedent. Since there is no interstate exchange of transcripts of marriage and divorce records, these statistics are limited to those events which occurred in South Carolina.

OCCURRENCE DATA are allocated in the place of South Carolina where the event occurred, regardless of the usual residence of the person involved.

Both residence and occurrence data are useful for different purposes. Occurrence data represent the requirements for hospitals and other facilities. These types of data may help to determine such needs as maternity services, intensive care facilities for newborn babies, or emergency room facilities. Residence data are more properly utilized in measuring the fertility and the incidence of death in the population living in an area.

2024 BIRTH AND DEATH ALLOCATIONS FOR S.C. RESIDENTS AND OCCURRENCES

	BIRTHS			DEATHS		
	Total	White	Black & Other	Total	White	Black & Other
Occurring in S.C.	54,752 *	36,816	17,936	57,533 *	42,899	14,622
Residents	54,110 *	36,364	17,746	55,425 *	41,292	14,133
Non-Residents	642 *	452	190	2,098 *	1,607	489
Residents of S.C.	58,768 *	39,711	19,057	58,235 *	43,354	14,881
In State	54,110 *	36,364	17,746	55,425 *	41,292	14,133
Out-of-State	4,658 *	3,347	1,311	2,810 *	2,062	748

* Includes Unknown Races

NOTE: Events to South Carolina residents on military status outside of the United States are not reflected in these tabulations.

DEFINITIONS OF TERMS

ABORTION: Purposeful termination of pregnancy with intention other than to produce a live born infant or to remove a dead fetus.

FETAL DEATH: Death prior to the complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy; the death is indicated by the fact that after such expulsion or extraction, the fetus does not breathe or show any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles. (Definition recommended by World Health Organization in 1950). A fetal death is required to be reported if the fetus weighs 350 grams or, if the weight is unknown, if the fetus has completed or passed the twentieth week of gestation. (Criteria effective since 2016). Vital Statistics Laws and Regulations 61-19: Vital Statistics, Section 21(a). **Heartbeats are to be distinguished from transient cardiac contractions; respirations are to be distinguished from fleeting respiratory efforts or gasps.**

INFANT DEATH: Death of a live born infant under one year of age.

LIVE BIRTH: The complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy, which, after such expulsion or extraction, breathes or shows any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached. (Definition recommended by World Health Organization in 1950). **Heartbeats are to be distinguished from transient cardiac contractions; respirations are to be distinguished from fleeting respiratory efforts or gasps.**

VERY LOW BIRTH WEIGHT: Very low birth weight is a weight at birth, which is less than 1,500 grams (3 pounds, 4 ounces), regardless of the period of gestation.

LOW BIRTH WEIGHT: Low birth weight is a weight at birth, which is less than 2,500 grams (5 pounds, 8 ounces), regardless of the period of gestation.

BODY MASS INDEX (BMI): Body mass index (BMI) is a measure of body fat based on height and weight that applies to adult men and women. Commonly accepted BMI ranges are

Underweight: less than 18.5;

Normal weight: greater or equal than 18.5 but less than 25;

Overweight: greater or equal than 25 but less than 30;

Obese: equal or above 30.

MARITAL STATUS ON BIRTH CERTIFICATE:

Unmarried - a birth which occurs to a woman who has never been married or who has been widowed or legally divorced from her husband in excess of 280 days.

Married - a birth which occurs to a woman who has been married or was married within 280 days from conception.

Paternity acknowledgment - gives authorization to list the name of the father on the birth certificate of a child born to an unmarried mother with written consent of the father and mother by means of an affidavit as required by South Carolina Law, Section 44-63-165. For statistical purposes, paternity acknowledgments are included in the "unmarried" category.

MATERNAL DEATH: Death of a woman whose cause of death is assigned to Complications of Pregnancy, Childbirth, and Puerperium (Tenth Revision ICD A34, O00-O95, O98-O99). If death occurred more than 42 days after termination of pregnancy, the death is not considered to be pregnancy-related and is assigned to codes O96-O97.

MULTIPLE CAUSES OF DEATH: A system of coding all of the medical entities reported on the death certificate.

NATURAL INCREASE: The increase in the population due to an excess of births over deaths for a particular period.

NEONATAL DEATH: Death of a live born infant under 28 days of age.

OCCURRENCE DATA: Data allocated to the place in South Carolina where the event occurred, regardless of the usual residence of the person involved.

PERINATAL DEATH: Death occurring during the perinatal period (i.e. to a live born infant less than 28 days of age or a fetus that has passed the twentieth week of gestation or weighs 350 grams or more).

POSTNEONATAL DEATH: Death of a live born infant 28-364 days of age.

RESIDENCE DATA: Data allocated to the place in South Carolina where the person normally resided, regardless of where the event occurred.

UNDERLYING CAUSE OF DEATH: The disease or injury that initiated the train of morbid events leading directly to death classified and coded according to the International Classification of Diseases (ICD).

INTERPRETATION OF DATA

RACE: Information on race of the mother and father is reported on birth and fetal death certificates, and the race of the decedent is reported on death certificates. Fetal deaths are reported by race of mother. As of 1990, Live Births are reported by race of mother instead of race of child. This change allows South Carolina's birth data to be consistent with the National Center for Health Statistics and other states throughout the United States. The race on reported marriages where the license was issued in South Carolina is by the race of groom and on divorces and annulments granted in South Carolina is by the race of husband. For statistical purposes, the tables in this report are based on the broad classifications of "white" and "black and other".

MULTIPLE RACES: Beginning with the 2000 Census, population information released by the U.S. Census Bureau contained a 'multiple' race category. In order to provide rates by single race category for vital events, the National Center for Health Statistics (NCHS) developed a 'bridging' methodology that would regroup the populations of the 'multiple' race category into standard single race categories. Beginning with 2002, these 'bridged' estimated population data were available for South Carolina. For 2000 and 2001, 'bridged' population data were not available at the time of publication. For these years, the staff of Budget and Control Board and the staff of the Division of Biostatistics and Health GIS, Public Health Statistics and Information Services, SCDHEC jointly developed methodologies that would regroup the population of the 'multiple' race category into standard single race categories.

Beginning with the new 2004 birth certificate multiple races can be checked for the race of both mother and father. Similarly, on the new 2005 death certificate multiple races can be checked for the race of the decedent. A methodology was developed that would regroup the 'multiple race' into standard single race categories. This methodology was developed by NCHS and the bridged race data are returned to the Division of Biostatistics, Public Health Statistics and Information Services for use in statistical analysis.

HISPANIC ORIGIN: Hispanic origin is reported separately from race. Thus a person with Hispanic origin can be of any race. The US Census Bureau began providing population estimates for Hispanics in 2002 which allowed birthrates to be calculated for this group.

PATERNITY ACKNOWLEDGMENT: For statistical purposes, paternity acknowledgments are included in the unmarried category.

COMPARABILITY: In order that disease classifications may be consistent with advances in medical science and changes in diagnostic practice, any system for categorizing causes of death must periodically be revised. Major revisions in the International Classification of Diseases (ICD), by which causes of death are classified, occur approximately every ten years, and each decennial revision of the ICD has produced some break in comparability of cause of death statistics. In South Carolina, the Sixth Revision of the ICD was used from 1949-1957; the Seventh Revision for 1958-1968; the Eighth 1969-1978; and the Ninth Revision went 1979-1998; and the Tenth Revision went into effect in 1999.

Prior to 1949, under the first five revisions, cause of death was selected on the basis of priority tables for multiple causes, as set forth in The Manual For Joint Causes of Death. Under the Sixth, Seventh, Eighth, and Ninth Revisions of the International Lists, the cause selected for tabulation has been the "underlying" cause, defined as the "disease or injury which initiated the train of morbid events, leading directly to death." (ICDA, Eighth Revision, 1968, Vol. 1, page xxix).

The introduction of the concept of "underlying" cause in 1949, with the Sixth Revision, resulted in a basic change in classification of death, which seriously affects the interpretation of mortality trends before and after 1949. The Seventh Revision was essentially a clarification of the Sixth Revision, but the Eighth Revision introduced some major modifications in classification lists and

coding procedures. The Ninth Revision also brought some major changes in classification and coding. However, the Tenth Revision introduced some of the most dramatic changes thus far. In order to make valid comparisons of mortality by cause for events classified by different revisions of the ICD, comparability ratios were developed. Comparability ratios are computed by the National Center for Health Statistics from the results of dual coding of certificates according to the old and the new procedures. Taking the number of deaths classified to a given cause by the Tenth Revision and dividing the result by the number of deaths classified to that cause by the Ninth Revision derived the comparability ratios used with the Tenth Revision. Provisional comparability ratios for the United States as a whole, based on the Ninth and Tenth Revisions, have been developed for a limited number of causes published by the National Center for Health Statistics. Tables are included in the Appendix portion of this report.

RATE CALCULATIONS WITH SMALL NUMBERS: There are variations in all statistics that are the result of chance. This characteristic is of particular importance in classifications with small numbers of events where small variations are proportionately large in relation to the base figure. As an example, small changes in the number of deaths or births in small population areas or in the number of deaths from uncommon causes could result in large changes in these crude rates. For this reason, rates for counties with small populations or other small bases should be used cautiously. In the Perinatal Section, 3-year rates are calculated to provide a more stable base for comparison of trends over time.

MEDICAL CERTIFICATION OF DEATH: Only a person authorized by law, usually a physician or a coroner, can make the medical certification of death. Thus, the reliability and accuracy of cause-of-death statistics are, to a large extent, governed by the acumen and ability of the doctor or coroner to make the proper diagnosis and by the care with which the death certificate is completed. It is recognized that death may not result from a single morbid condition. Since 1980, South Carolina medical certifiers have been asked to provide contributing conditions adding to the underlying cause of death information. Nineteen hundred eighty-eight is the first year that multiple cause information was included in this report.

MULTIPLE CAUSE OF DEATH: Cause of death statistics have, for many years, been based only on the underlying cause of death, the single disease or injury that initiated the train of events leading to death or the circumstances of the accident that produced the fatal injury. The underlying cause is selected by a computerized algorithm called the Automated Classification of Medical Entities (ACME) from the ordering of conditions reported by physicians or coroners on the death certificate. Analysis of the underlying cause of death information allows for simplified, consistent reporting of data and provides a means of evaluating the impact of public health initiatives. When more than one cause is reported on the certificate, however, the tabulation of only one cause for mortality statistics may lead to a loss of information on any condition that is an element in the death but that is not selected as the underlying cause of death. Cause-of-death statistics are usually based on the underlying cause of death, a single disease or injury circumstance that initiated the sequence of events leading to death. In this system, each death is assigned one underlying cause of death. However, death certificates provide for the inclusion of more information than the underlying cause of death alone. The immediate cause of death, the antecedent causes giving rise to the immediate cause and other significant conditions contributing to the death may also be entered by the medical certifier. These data provide a way of estimating the impact of significant co-factors contributing to a death and offer a means of utilizing information on causes, such as hypertension, asthma, bronchitis, and diabetes, that are frequently present at death but that are usually not lethal by themselves. Each death is assigned one underlying cause and up to nineteen contributing causes of death.

CLASSIFICATION AND METHODOLOGY IN DETERMINING LEADING CAUSES OF INFANT DEATH: The leading causes of infant mortality in this report are based on the National Center for Health Statistics (NCHS) list of 130 selected causes of infant mortality. The same methodology used by NCHS to rank the causes of infant death has also been adopted for this report. This change represents an attempt to standardize reporting of South Carolina data to the national model. The broad categories of cause of death used in determining the leading causes of infant

death have been subdivided into more specific categories. This change in methodology makes the leading causes of infant death tables in this report not comparable to similar tables in the reports of years prior to 1998.

POPULATION DATA: Before the year 2021, South Carolina population estimates were available from the National Center for Health Statistics (NCHS) for the state as a whole and for each county by age, race, and gender. In order to provide rates for vital records data by single race category, NCHS developed a 'bridging' methodology, which regrouped the population of the Census, designated 'multiple race' categories into single race categories. The 2000 Census was the first nationwide implementation of revised standards requiring federal agencies to offer individuals the opportunity to select one or more races. NCHS population estimates by age and gender category are consistent with corresponding population data provided to the Office of Research and Statistics, South Carolina Budget and Control Board by the US Census Bureau for the state as a whole and for each county. For age groups of 15-17 and 18-19 years, it is assumed that the population within the five-year age groups of 15-19 is distributed uniformly throughout these age intervals.

After year 2021 including 2021, South Carolina population estimates were available from U.S. Census. Same assumptions of age grouping were used in this report.

KOTELCHUCK INDEX: The Kotelchuck Index, also called the Adequacy of Prenatal Care Utilization (APNCU) Index, uses two crucial elements obtained from birth certificate data - when prenatal care began (initiation) and the number of prenatal visits from when prenatal care began until delivery (received services). The Kotelchuck Index classifies the adequacy of initiation as follows: pregnancy months 1 and 2, months 3 and 4, months 5 and 6, and months 7 to 9, with the underlying assumption that the earlier prenatal care begins the better. To classify the adequacy of received services, the number of prenatal visits is compared to the expected number of visits for the period between when care began and the delivery date. The expected number of visits is based on the American College of Obstetricians and Gynecologists prenatal care standards for uncomplicated pregnancies and is adjusted for the gestational age when care began and for the gestational age at delivery.

A ratio of observed to expected visits is calculated and grouped into four categories-Inadequate (received less than 50% of expected visits), Intermediate (50%-79%), Adequate (80%-109%), and Adequate Plus (110% or more). The final Kotelchuck Index measure combines these two dimensions into a single summary score. The profiles define adequate prenatal care as a score of 80% or greater on the Kotelchuck Index, or the sum of the Adequate and Adequate Plus categories. (See the graph on the next page.)

The Kotelchuck Index does not measure the quality of prenatal care. It also depends on the accuracy of the patient or health care provider's recall of the timing of the first visit and the number of subsequent visits. The Kotelchuck Index uses recommendations for low-risk pregnancies, and may not measure the adequacy of care for high-risk women. The Kotelchuck Index is preferable to other indices because it includes a category for women who receive more than the recommended amount of care (adequate plus, or intensive utilization).

The Summary of Adequacy of Kotelchuck Index¹

 **Inadequate** - Prenatal care begun after 4th month, or less than 50% of recommended visits. Includes no prenatal care received.

 **Intermediate** - Prenatal care begun by 4th month, and 50% - 79% of recommended visits.

 **Adequate** - Prenatal care begun by 4th month, and 80% - 109% of recommended visits.

 **Adequate Plus** - Prenatal care begun by 4th month, and 110% or more of recommended visits.

¹ Adapted from Kotelchuck M., "An Evaluation of the Kessner Adequacy of Prenatal Care Index and a Proposed Adequacy of Prenatal Care Utilization Index", American Journal of Public Health, 1994, 84(9): 1414-20.

IMPLEMENTATION OF THE INTERNATIONAL CLASSIFICATION OF DISEASES (ICD) 10TH REVISION

The ICD is a classification system developed collaboratively between the World Health Organization (WHO) and 10 international centers so that the medical terms reported by physicians, medical examiners, and coroners on death certificates can be grouped together for statistical purposes. In 1999 ICD-10 replaced the ICD-9, used with 1979-1998 data.

The purpose of the ICD and of WHO sponsorship is to promote international comparability in the collection, classification, processing and presentation of mortality statistics. New revisions of the ICD are implemented periodically so that the classification reflects advances in medical science.

ICD-10 affects the classification, processing, and presentation of mortality data. Some titles have changed. The total number of categories has doubled as a result of the addition or deletion of terms used to describe diseases or conditions. The transfer of certain diseases from one section to another reflects new discoveries and advances in knowledge on the nature or causes of particular diseases. The addition of separate categories identifies specific diseases or particular complications of diseases that are of growing interest. Additionally, the codes associated with each title have been converted from numeric to alphanumeric entities. The ICD rules for processing mortality data are generally similar but account for some changes observed in mortality statistics.

HOW ICD-10 COMPARES TO ICD-9

The intent of developing new revisions is to incorporate changes in medical knowledge. Compared with ICD-9, the ICD-10 has:

- expanded detail for many conditions (e.g., viral hepatitis has been expanded from ICD-9 code 070, a single 3-digit category, to ICD-10 codes B15-B19, five 3-digit categories)
- transferred conditions around the classification (e.g., hemorrhage has been moved from the circulatory chapter to the symptoms and signs chapter)
- used alphanumeric codes instead of numeric codes (e.g., code for diabetes mellitus was 250 in ICD-9 and is E10-E14 in ICD-10)
- modified coding rules (e.g., the "Old pneumonia, influenza, and maternal conditions" and "Error and accidents in medical care" coding rules have been eliminated)
- modified the tabulations lists (e.g., the US' ICD-10 113-cause list replaces the US' ICD-9 72-cause list)

FORMULAE

Vital statistics data provide better measures of health status when they are related to the size of the population and particularly to the age and sex components of the population. These relationships are usually expressed in terms of rates or percentages. During intercensal years, the validity of vital statistics rates depends upon the accuracy of population estimates.

For the most part, rates presented in this report are crude rates, i.e., the number of events per 1,000 total population. Crude rates are limited for purposes of making comparisons among geographic areas and for changes over time because they ignore characteristics of the population, such as age and sex. Age-adjusted rates or further analyses may be necessary in order to make valid comparisons.

Rates used in this report are calculated as follows:

Cause of Death Rate	= $\frac{\text{Annual number of deaths from a stated cause}}{\text{Population of area}}$	X 100,000
Death Rate (crude)	= $\frac{\text{Annual number of deaths}}{\text{Population of area}}$	X 1,000
Divorce Rate (crude)	= $\frac{\text{Annual number of divorces}}{\text{Population of area}}$	X 1,000
Fetal Mortality Rate	= $\frac{\text{Annual number of fetal deaths}}{\text{Annual number of live births} + \text{Annual number of fetal deaths}}$	X 1,000
General Fertility Rate	= $\frac{\text{Annual number of live births}}{\text{Population of women 15-44 years of age}}$	X 1,000
Birth Rate of Unmarried Mothers	= $\frac{\text{Annual number of unmarried mothers}}{\text{Annual number of live births}}$	X 1,000
Infant Mortality Rate	= $\frac{\text{Annual number of infant deaths}}{\text{Annual number of live births}}$	X 1,000
Live Birth Rate (Crude)	= $\frac{\text{Annual number of live births}}{\text{Population of area}}$	X 1,000
Marriage Rate (Crude)	= $\frac{\text{Annual number of marriages}}{\text{Population of area}}$	X 1,000
Maternal Mortality Rate	= $\frac{\text{Annual number of maternal deaths}}{\text{Annual number of live births}}$	X 10,000
Neonatal Mortality Rate	= $\frac{\text{Annual number of neonatal deaths}}{\text{Annual number live births}}$	X 1,000
Postneonatal Mortality Rate	= $\frac{\text{Annual number of postneonatal deaths}}{\text{Annual number of live births}}$	X 1,000
Perinatal Mortality Rate	= $\frac{\text{Annual number of fetal deaths} + \text{Annual number of neonatal deaths}}{\text{Annual number of live births} + \text{Annual number of fetal deaths}}$	X 1,000
Low Weight Birth Rate	= $\frac{\text{Annual number of live births weighing less than 2500 grams}}{\text{Annual number of live births}}$	X 1,000

Grams Weight Conversion Chart

500 grams or less	=	1 lb. 1 oz. or less
501 - 1,000 grams	=	1 lb. 2 oz. - 2 lb. 3 oz.
1,001 - 1,500 grams	=	2 lb. 4 oz. - 3 lb. 4 oz.
1,501 - 2,000 grams	=	3 lb. 5 oz. - 4 lb. 6 oz.
2,001 - 2,500 grams	=	4 lb. 7 oz. - 5 lb. 8 oz.
2,501 - 3,000 grams	=	5 lb. 9 oz. - 6 lb. 9 oz.
3,000 - 3,500 grams	=	6 lb. 10 oz. - 7 lb. 11 oz.
3,501 - 4,000 grams	=	7 lb. 12 oz. - 8 lb. 13 oz.
4,001 - 4,500 grams	=	8 lb. 14 oz. - 9 lb. 14 oz.
4,501 - 5,000 grams	=	9 lb. 15 oz. - 11 lb. 0 oz.
5,001 grams or more	=	11 lb. 1 oz. - or more

APPENDIX

LIST OF 113 SELECTED CAUSES OF DEATH

Number	Cause of death
	All causes.....
1#	Salmonella infections.....A01-A02
2#	Shigellosis and amebiasis.....A03,A06
3	Certain other intestinal infections.....A04,A07-A09
#	Tuberculosis.....A16-A19
4	Respiratory tuberculosis.....A16
5	Other tuberculosis.....A17-A19
6#	Whooping cough.....A37
7#	Scarlet fever and erysipelas.....A38,A46
8#	Meningococcal infection.....A39
9#	Septicemia.....A40-A41
10#	Syphilis.....A50-A53
11#	Acute poliomyelitis.....A80
12#	Arthropod-borne viral encephalitis.....A83-A84,A85.2
13#	Measles.....B05
14#	Viral hepatitis.....B15-B19
15#	Human immunodeficiency virus (HIV) disease.....B20-B24
16#	Malaria.....B50-B54
17	Other and unspecified infectious and parasitic diseases and their sequelaeA00,A05,A20-A36,A42-A44,A48-A49,A54-A79, A81-A82,A85.0-A85.1,A85.8,A86-B04,B06-B09,B25-B49,B55-B99
#	Malignant neoplasms.....C00-C97
18	Malignant neoplasms of lip, oral cavity and pharynx.....C00-C14
19	Malignant neoplasm of esophagus.....C15
20	Malignant neoplasm of stomach.....C16
21	Malignant neoplasms of colon, rectum and anus.....C18-C21
22	Malignant neoplasms of liver and intrahepatic bile ducts.....C22
23	Malignant neoplasm of pancreas.....C25
24	Malignant neoplasm of larynx.....C32
25	Malignant neoplasms of trachea, bronchus and lung.....C33-C34
26	Malignant melanoma of skin.....C43
27	Malignant neoplasm of breast.....C50
28	Malignant neoplasm of cervix uteri.....C53
29	Malignant neoplasms of corpus uteri and uterus, part unspecified.....C54-C55
30	Malignant neoplasm of ovary.....C56
31	Malignant neoplasm of prostate.....C61
32	Malignant neoplasms of kidney and renal pelvis.....C64-C65
33	Malignant neoplasm of bladder.....C67
34	Malignant neoplasms of meninges, brain and other parts of central nervous system.....C70-C72
	Malignant neoplasms of lymphoid, hematopoietic and related tissue.....C81-C96
35	Hodgkin's disease.....C81
36	Non-Hodgkin's lymphoma.....C82-C85
37	Leukemia.....C91-C95
38	Multiple myeloma and immunoproliferative neoplasms.....C88,C90
39	Other and unspecified malignant neoplasms of lymphoid, hematopoietic and related tissue.....C96
40	All other and unspecified malignant neoplasms.....C17,C23-C24,C26-C31, C37-C41,C44-C49,C51-C52,C57-C60,C62-C63,C66,C68-C69,C73-C80,C97
41#	In situ neoplasms, benign neoplasms and neoplasms of uncertain or unknown behavior.....D00-D48
42#	Anemias.....D50-D64
43#	Diabetes mellitus.....E10-E14
#	Nutritional deficiencies.....E40-E64
44	Malnutrition.....E40-E46
45	Other nutritional deficiencies.....E50-E64
46#	Meningitis.....G00,G03
47#	Parkinson's disease.....G20-G21
48#	Alzheimer's disease.....G30
#	Major cardiovascular diseases.....I00-I78
	Diseases of heart.....I00-I09,I11,I13,I20-I51
49	Acute rheumatic fever and chronic rheumatic heart diseases.....I00-I09
50	Hypertensive heart disease.....I11

LIST OF 113 SELECTED CAUSES OF DEATH-Con.

Number	Cause of death
51	Hypertensive heart and renal disease.....I13
	Ischemic heart diseases.....I20-I25
52	Acute myocardial infarction.....I21-I22
53	Other acute ischemic heart diseases.....I24
	Other forms of chronic ischemic heart disease.....I20,I25
54	Atherosclerotic cardiovascular disease, so described.....I25.0
55	All other forms of chronic ischemic heart disease.....I20,I25.1-I25.9
	Other heart diseases.....I26-I51
56	Acute and subacute endocarditis.....I33

35c. DATE OF LAST LIVE BIRTH ____/____/____ MM YYYY	36a. DATE OF LAST OTHER PREGNANCY OUTCOME ____/____/____ MM YYYY	39. DATE LAST NORMAL MENSES BEGAN ____/____/____ MM DD YYYY	40. MOTHER'S MEDICAL RECORD NUMBER _____								
41. RISK FACTORS IN THIS PREGNANCY (Check all that apply) Diabetes ☐ Prepregnancy (Diagnosis prior to this pregnancy) ☐ Gestational (Diagnosis in this pregnancy) Hypertension ☐ Prepregnancy (Chronic) ☐ Gestational (PIH, preeclampsia) ☐ Eclampsia ☐ Previous preterm birth ☐ Pregnancy resulted from infertility treatment - if yes, check all that apply ☐ Fertility-enhancing drugs, Artificial insemination or Intrauterine insemination ☐ Assisted reproductive technology (e.g. in vitro fertilization (IVF), gamete intrafallopian transfer (GIFT)) ☐ Mother had a previous cesarean delivery If yes, how many _____ ☐ None of the above		43. OBSTETRIC PROCEDURES (Check all that apply) External cephalic version: ☐ Successful ☐ Failed ☐ None of the above 44. CHARACTERISTICS OF LABOR AND DELIVERY (Check all that apply) ☐ Induction of labor ☐ Augmentation of labor ☐ Steroids (glucocorticoids) for fetal lung maturation received by the mother prior to delivery ☐ Antibiotics received by the mother during labor ☐ Clinical chorioamnionitis diagnosed during labor or maternal temperature $\geq 38^{\circ}\text{C}$ (100.4°F) ☐ Epidural or spinal anesthesia during labor ☐ None of the above									
42. INFECTIONS PRESENT AND/OR TREATED DURING THIS PREGNANCY (Check all that apply) ☐ Gonorrhea ☐ Syphilis ☐ Herpes Simplex Virus (HSV) ☐ Chlamydia ☐ Hepatitis B ☐ Hepatitis C ☐ None of the above		45. METHOD OF DELIVERY A. Fetal presentation at birth ☐ Cephalic ☐ Breech ☐ Other B. Final route and method of delivery (Check one) ☐ Vaginal/Spontaneous ☐ Vaginal/Forceps ☐ Vaginal/Vacuum ☐ Cesarean If Cesarean, was a trial of labor attempted? ☐ Yes ☐ No 46. MATERNAL MORBIDITY (Check all that apply) (Complications associated with labor and delivery) ☐ Maternal transfusion ☐ Third or fourth degree perineal laceration ☐ Ruptured uterus ☐ Unplanned hysterectomy ☐ Admission to intensive care unit ☐ None of the above									
NEWBORN INFORMATION											
47. NEWBORN MEDICAL RECORD NUMBER: _____	53. ABNORMAL CONDITIONS OF THE NEWBORN (Check all that apply) ☐ Assisted ventilation required immediately following delivery ☐ Assisted ventilation required for more than six hours ☐ NICU admission ☐ Newborn given surfactant replacement therapy ☐ Antibiotics received by the newborn for suspected neonatal sepsis ☐ Seizure or serious neurologic dysfunction ☐ None of the above										
48. BIRTHWEIGHT (grams preferred, specify unit) _____ ☐ grams ☐ lb/oz	54. CONGENITAL ANOMALIES OF THE NEWBORN (Check all that apply) ☐ Anencephaly ☐ Meningomyelocele/Spina bifida ☐ Cyanotic congenital heart disease ☐ Congenital diaphragmatic hernia ☐ Omphalocele ☐ Gastroschisis ☐ Limb reduction defect (excluding congenital amputation and dwarfing syndromes) ☐ Cleft Lip with or without Cleft Palate ☐ Cleft Palate alone ☐ Down Syndrome ☐ Karyotype confirmed ☐ Karyotype pending ☐ Suspected chromosomal disorder ☐ Karyotype confirmed ☐ Karyotype pending ☐ Hypospadias ☐ None of the anomalies listed above										
49. OBSTETRIC ESTIMATE OF GESTATION: _____ (completed weeks)	55. WAS INFANT TRANSFERRED WITHIN 24 HOURS OF DELIVERY? ☐ Yes ☐ No IF YES, NAME OF FACILITY INFANT TRANSFERRED TO: _____										
50. APGAR SCORE: Score at 5 minutes: _____ If 5 minute score is less than 6, Score at 10 minutes: _____	56. IS INFANT LIVING AT TIME OF REPORT? ☐ Yes ☐ No ☐ Infant transferred, status unknown										
51. PLURALITY - Single, Twin, Triplet, etc. (Specify) _____	57. IS INFANT BEING BREASTFED? ☐ Yes ☐ No										
52. IF NOT SINGLE BIRTH - Born First, Second, Third, etc. (Specify) _____	58. WHAT PROPHYLACTIC USED IN EYES? (Specify) _____										
55. WAS INFANT TRANSFERRED WITHIN 24 HOURS OF DELIVERY? ☐ Yes ☐ No IF YES, NAME OF FACILITY INFANT TRANSFERRED TO: _____		56. IS INFANT LIVING AT TIME OF REPORT? ☐ Yes ☐ No ☐ Infant transferred, status unknown	57. IS INFANT BEING BREASTFED? ☐ Yes ☐ No								
58. WHAT PROPHYLACTIC USED IN EYES? (Specify) _____		59. TIME USED (24-hour clock) _____									

NAME OF DECEDENT
For use by physician or institution

Items 1-23c To Be Completed/Verified By: FUNERAL DIRECTOR	1. DECEDENT'S LEGAL NAME (Include AKAs, if any) (First, Middle, Last, Suffix)					2. SEX	3. SOCIAL SECURITY NUMBER	
	4a. AGE-Last Birthday (Years)		4b. UNDER 1 YEAR Months	4c. UNDER 1 DAY Hours	Minutes	5. DATE OF BIRTH (MM/DD/YYYY)	6. BIRTHPLACE (State or Foreign Country)	
	7a. RESIDENCE-STATE		7b. COUNTY			7c. CITY OR TOWN		
	7d. STREET AND NUMBER				7e. APT. NO.	7f. ZIP CODE	7g. INSIDE CITY LIMITS? ☐ Yes ☐ No	
	8. EVER IN US ARMED FORCES? ☐ Yes ☐ No		9. MARITAL STATUS AT TIME OF DEATH ☐ Married ☐ Married, but separated ☐ Widowed ☐ Divorced ☐ Never Married ☐ Unknown			10. SURVIVING SPOUSE'S NAME PRIOR TO FIRST MARRIAGE (First, Middle, Last, Suffix)		
	11. FATHER/PARENT NAME PRIOR TO FIRST MARRIAGE (First, Middle, Last, Suffix)				12. MOTHER/PARENT NAME PRIOR TO FIRST MARRIAGE (First, Middle, Last, Suffix)			
	13a. INFORMANT'S LEGAL NAME		13b. RELATIONSHIP TO DECEDENT		13c. MAILING ADDRESS (Street and Number, City, State, Zip Code)			
	14. PLACE OF DEATH (Check only one: see instructions)							
	IF DEATH OCCURRED IN A HOSPITAL: ☐ Inpatient ☐ Emergency Room/Outpatient ☐ Dead on Arrival				IF DEATH OCCURRED SOMEWHERE OTHER THAN A HOSPITAL: ☐ Hospice facility ☐ Nursing home/Long term care facility ☐ Decedent's home ☐ Other (Specify) _____			
	15. FACILITY NAME (If not institution, give street and number)				16. CITY OR TOWN, STATE AND ZIP CODE		17. COUNTY OF DEATH	
	18. METHOD OF DISPOSITION ☐ Burial ☐ Cremation ☐ Donation ☐ Entombment ☐ Removal from state ☐ Other (Specify) _____				19. PLACE OF DISPOSITION (Name of cemetery, crematory, other place)			
	20. LOCATION-CITY/TOWN AND STATE				21. NAME AND ADDRESS OF FUNERAL FACILITY OR OTHER AGENT			
22. SIGNATURE OF FUNERAL SERVICE LICENSEE OR OTHER AGENT					23. LICENSE NUMBER (Of Licensee)			
23a. SIGNATURE OF EMBALMER				23b. EMBALMER LICENSE NUMBER		23c. LICENSE NUMBER (Of Facility)		
Items 24-49 To Be Completed By: MEDICAL CERTIFIER	ITEMS 24-28 SHOULD BE COMPLETED BY PERSON WHO PRONOUNCES OR CERTIFIES DEATH, IF APPLICABLE			24. DATE PRONOUNCED DEAD (MM/DD/YYYY)		25. TIME PRONOUNCED DEAD		
	26. SIGNATURE OF PERSON PRONOUNCING DEATH (Only when applicable)			27. LICENSE NUMBER		28. DATE SIGNED (MM/DD/YYYY)		
	29. ACTUAL OR PRESUMED DATE OF DEATH (MM/DD/YYYY)			30. ACTUAL OR PRESUMED TIME OF DEATH		31. WAS CORONER OR MEDICAL EXAMINER CONTACTED? ☐ Yes ☐ No		
	CAUSE OF DEATH (See instructions and examples)						Approximate interval: Onset to death _____ _____ _____ _____	
	32. PART I. Enter the <u>chain of events</u> -diseases, injuries, or complications-that directly caused the death. DO NOT enter terminal events such as cardiac arrest, respiratory arrest, or ventricular fibrillation without showing the etiology. DO NOT ABBREVIATE. Enter only one cause on a line. Add additional lines if necessary. IMMEDIATE CAUSE (Final disease or condition resulting in death) → a. _____ Due to (or as a consequence of): _____ Sequentially list conditions, if any, leading to the cause listed on line a. Enter the UNDERLYING CAUSE (disease or injury that initiated the events resulting in death) LAST b. _____ Due to (or as a consequence of): _____ c. _____ Due to (or as a consequence of): _____ d. _____							
	PART II. Enter other <u>significant conditions</u> contributing to death but not resulting in the underlying cause given in PART I.							
	35. DID TOBACCO USE CONTRIBUTE TO DEATH? ☐ Yes ☐ Probably ☐ No ☐ Unknown			36. IF FEMALE: ☐ Not pregnant within past year ☐ Pregnant at time of death ☐ Not pregnant, but pregnant within 42 days of death ☐ Not pregnant, but pregnant 43 days to one year before death ☐ Unknown if pregnant within the past year		37. MANNER OF DEATH ☐ Natural ☐ Homicide ☐ Accident ☐ Pending investigation ☐ Suicide ☐ Could not be determined		
	38. DATE OF INJURY (MM/DD/YYYY)		39. TIME OF INJURY	40. PLACE OF INJURY (e.g., Decedent's home, construction site, restaurant, wooded area)				41. INJURY AT WORK? ☐ Yes ☐ No
	42. LOCATION OF INJURY: State: _____ City or Town: _____ County: _____ Street & Number: _____ Apartment Number: _____ Zip Code: _____							
	43. DESCRIBE HOW INJURY OCCURRED:					44. IF TRANSPORTATION INJURY, SPECIFY: ☐ Driver/Operator ☐ Pedestrian ☐ Passenger ☐ Other (Specify) _____		
	45. CERTIFIER (Check only one) ☐ Certifying physician-To the best of my knowledge, death occurred due to the cause(s) and manner stated. ☐ Pronouncing and Certifying physician-To the best of my knowledge, death occurred at the time, date, and place, and due to the cause(s) and manner stated. ☐ Coroner/Medical Examiner-On the basis of examination and /or investigation, in my opinion, death occurred at the time, date, and place, and due to the cause(s) and manner stated. Signature of certifier: _____							
	47. NAME, ADDRESS, AND ZIP CODE OF PERSON COMPLETING CAUSE OF DEATH (Item 32)					46. DATE CERTIFIED (MM/DD/YYYY)		
	48. TITLE OF CERTIFIER					47a. NAME OF ATTENDING PHYSICIAN IF OTHER THAN CERTIFIER		
	49. LICENSE NUMBER			50. FOR REGISTRAR ONLY-DATE FILED (MM/DD/YYYY)				
	Items 51-55 To Be Completed By: FUNERAL DIRECTOR	51. DECEDENT'S EDUCATION-Check the box that best describes the highest degree or level of school completed at the time of death. ☐ 8th grade or less ☐ 9th-12th grade; no diploma ☐ High school graduate or GED completed ☐ Some college credit, but no degree ☐ Associate degree (e.g., AA, AS) ☐ Bachelor's degree (e.g., BA, AB, BS) ☐ Master's degree (e.g., MA, MS, MEng, MEd, MSW, MBA) ☐ Doctorate (e.g., PhD, EdD) or Professional degree (e.g., MD, DDS, DVM, LLB, JD)		52. DECEDENT OF HISPANIC ORIGIN?-Check the box that best describes whether the decedent was Spanish/Hispanic/Latino/Latina. Check the "No" box if decedent was not Spanish/Hispanic/Latino/Latina. ☐ No, not Spanish/Hispanic/Latino/Latina ☐ Yes, Mexican, Mexican American, Chicano/Chicana ☐ Yes, Puerto Rican ☐ Yes, Cuban ☐ Yes, other Spanish/Hispanic/Latino/Latina (Specify) _____		53. DECEDENT'S RACE-(Check one or more races to indicate what the decedent considered their race to be) ☐ White ☐ Black or African American ☐ American Indian or Alaska Native (Name of the enrolled or principal tribe) _____ ☐ Asian Indian ☐ Chinese ☐ Filipino ☐ Japanese ☐ Korean ☐ Vietnamese ☐ Other Asian (Specify) _____ ☐ Native Hawaiian ☐ Guamanian or Chamorro ☐ Samoan ☐ Other Pacific Islander (Specify) _____ ☐ Other (Specify) _____		
		54. DECEDENT'S USUAL OCCUPATION (Indicate type of work done during most of working life. DO NOT USE THE TERM "RETIRED.")						
		55. KIND OF BUSINESS/INDUSTRY
