Virologic Surveillance

This week **286** lab-confirmed tests were reported. In the current flu season, there have been **286** lab-confirmed tests reported.

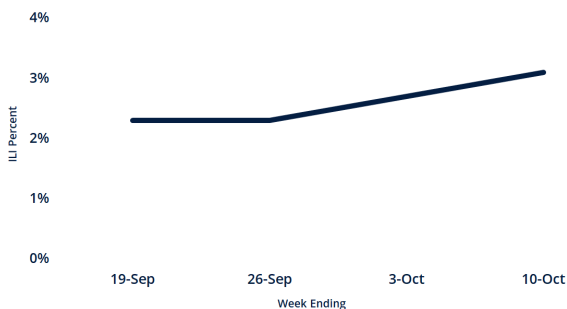

Influenza-Associated Hospitalizations

This week **50** influenza-associated hospitalizations were reported by **62** hospitals. The cumulative hospitalization rate is **1.0 per 100,000**. In the current flu season, there have been **50** influenza-associated hospitalizations.

Influenza-Like Illness Surveillance

The percent of patient visits to sentinel providers for an influenza-like illness (ILI) was **3.1%**, which is **below** South Carolina's baseline (**3.2%**). The ILI activity level overall was **low**.

Influenza-Associated Deaths

This week, **no** influenza-associated deaths were reported. The cumulative mortality rate is **0.0 per 100,000**. In the current flu season, there have been **0** influenza-associated deaths.

Influenza-Like Illness (ILI) Surveillance

This week, the ILI activity level was **low** and **3.1%** of patient visits to SC ILINet providers were attributed to an influenza-like illness. This is **below** the state baseline of **3.2%**.

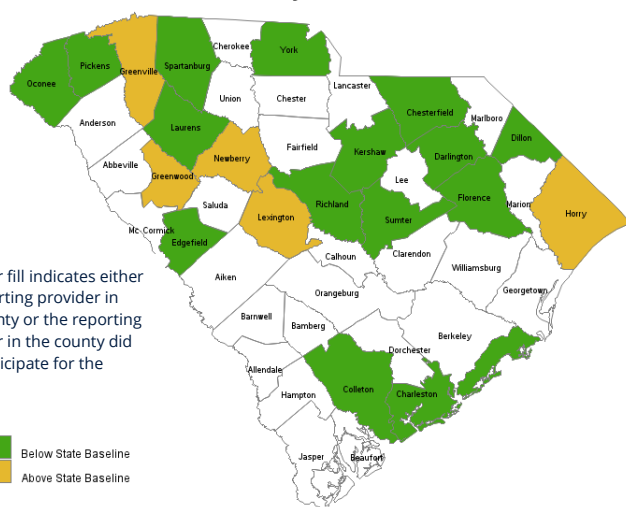

Reports were received from providers in **20** counties, representing all DPH Public Health regions.

****ILI percentage is dependent upon the number of reporting providers and/or can vary by disease activity or the number of providers submitting reports.****
