Postpartum Newborn Home Visiting Service
 by a Public Health Nurse

scdhec.gov

What is a Postpartum Newborn Home Visit?

The postpartum newborn home visit is a service for new moms and their babies. Health Department nurses provide the visit to eligible families. The visit is covered by some Medicaid insurance plans. Ask your doctor to make a referral or write an order for a visit.

In the first few days after you and your baby leave the hospital, many changes take place. During the postpartum newborn home visit the nurse will come to your home to make sure you and your baby are doing well.

Someone will contact you or a relative to schedule a time for the nurse to visit you in your home. The nurse will usually spend 1-2 hours with you and your baby.

“A healthy start for you and your baby”

What Will the Nurse Do?

- Ask questions about your health and your baby's health
- Weigh your baby
- Do a physical exam of your baby
- Check your blood pressure
- Do a partial physical exam on you, if needed
- Help you get health care providers' appointments for you and your baby
- Help you with breastfeeding, if needed
- Give you a method of birth control, such as condoms, if needed
- Talk with you about other community resources you may find helpful such as WIC, Babynet, and reading programs
- Answer your questions

To help you care for yourself, the nurse will talk to you about:

- Breast care
- Signs and symptoms of illness
- Taking care of yourself
- Postpartum activity
- Sleep needs
- Nutritional needs
- Birth control methods
- Prevention of sexually transmitted infections

To help you care for your baby, the nurse will talk to you about:

- Well child care
- Baby's brain development
- Immunizations
- Safety in the car, home, and other places
- Hand washing
- Signs and symptoms of illness
- Taking care of baby's skin, mouth, and diaper area
- Umbilical cord care and circumcision care
- Care for your infant son's penis if he is not circumcised
- Feeding your baby
- Safe sleep, infant sleep patterns, and SIDS risk reduction
- Shaken baby syndrome prevention
- Exposure to second-hand smoke and other harmful substances
