SC Ryan White Service Providers

Ryan White Parts in South Carolina

Part B

Part B of HRSA's Ryan White HIV/AIDS Program (RWHAP) funds States and Territories to deliver HIV/AIDS care, including HIV/AIDS medications under the AIDS Drug Assistance Program (ADAP). Part B addresses care needs across many cities and rural regions. Decisions about what to fund are typically made by statewide planning groups or regional and local consortia. Services are then delivered directly by States/Territories and by nonprofit agencies. HRSA project officers and technical assistance/training services help Part B programs conduct planning; deliver care (with attention to quality, clinician training, and data reporting); and manage their grant funds. [Learn more about Part B](#)

Part C

Part C of HRSA's Ryan White HIV/AIDS Program (RWHAP) provides comprehensive primary health care in an outpatient setting for people living with HIV disease. The main Part C program, Early Intervention Services (EIS), funds hundreds of community agencies to engage underserved individuals in HIV/AIDS care. A smaller Part C program, called Capacity Development, funds agencies to build or improve their ability to deliver HIV/AIDS care. HRSA project officers and training/technical assistance helps Part C recipients in areas like quality management, data reporting, third party reimbursement, planning and managing their grants. [Learn more about Part C](#)

Part D

Part D of HRSA's Ryan White HIV/AIDS Program (RWHAP) provides outpatient family-centered care for women, infants, children, and youth with HIV/AIDS. Medical care and support services are the same as provided by other Ryan White agencies, with the difference being attention to specific needs of women and their families. HRSA project officers and training/technical assistance addresses topics like quality management, data reporting, and program management. [Learn more about Part D](#)

Part F

The AIDS Education and Training Centers (AETC) Program of HRSA's Ryan White HIV/AIDS Program (RWHAP) delivers HIV/AIDS clinical training via a network of regional and national centers. AETCs train providers to counsel, diagnose, treat, and medically manage people with HIV disease, and to help prevent high-risk behaviors that lead to HIV transmission. Regional (multi-state) AETCs carry out the bulk of hands-on and distance-based learning. National AETCs support the regions and deliver cross-cutting assistance, including web-based resources, multicultural training, evaluation, and online and phone-based clinical consultation. [Learn more about Part F](#)
