Influenza-Like Illness (ILI) Surveillance

This week, the ILI activity level was **high** and **4.9%** of patient visits to SC ILINet providers were attributed to an influenza-like illness. This is **above** the state baseline of **3.6%**.

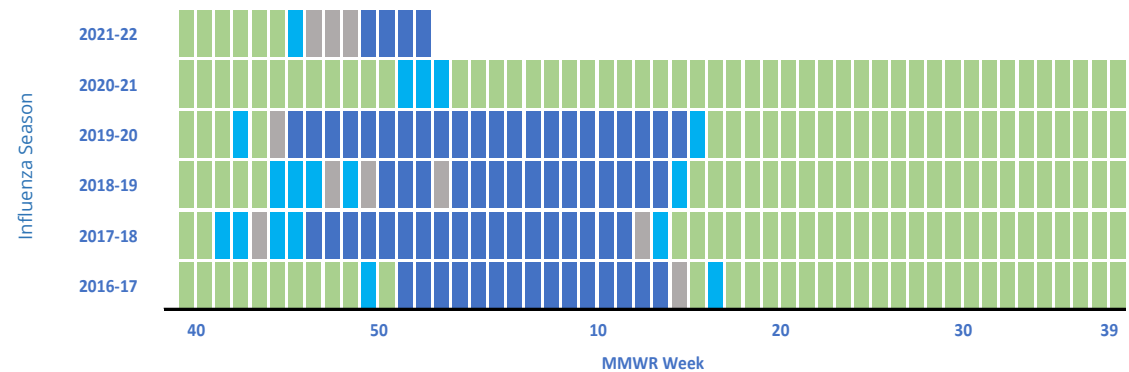

Reports were received from providers in **24** counties, representing all DHEC Public Health regions.

ILI percentage is dependent upon the number of reporting providers and/or can vary by disease activity or the number of providers submitting reports.
