No change

Virologic Surveillance

This week **3** lab-confirmed tests were reported. In the current flu season, there have been **4743** lab-confirmed tests reported.

Influenza-Like Illness Surveillance

The percent of patient visits to sentinel providers for an influenza-like illness (ILI) was **0.71%**, which is **below** South Carolina's baseline (**3.53%**). The ILI activity level overall was minimal.

Influenza-Associated Hospitalizations

This week **4** influenza-associated hospitalizations were reported by **38** hospitals. The cumulative hospitalization rate is **54.8 per 100,000**. In the current flu season, there have been **2755** influenza-associated hospitalizations.

Influenza-Associated Deaths

This week **0** influenza-associated deaths were reported. The cumulative mortality rate is **2.0 per 100,000**. In the current flu season, there have been **99** influenza-associated deaths.

For a description of South Carolina's influenza surveillance components and definitions go to:

Influenza Activity*

In the 4 Public Health Regions, activity showed...

Overall there was no change in influenza activity statewide.

*Indicators for assessing influenza activity include: lab-confirmed tests, ILI percent, and hospitalizations.

Influenza-Like Illness Surveillance

This week, the ILI activity level was **minimal** and **0.71%** of patient visits to SC ILINet providers was attributed to an influenza-like illness. This is **below** the state baseline, **3.53%**.

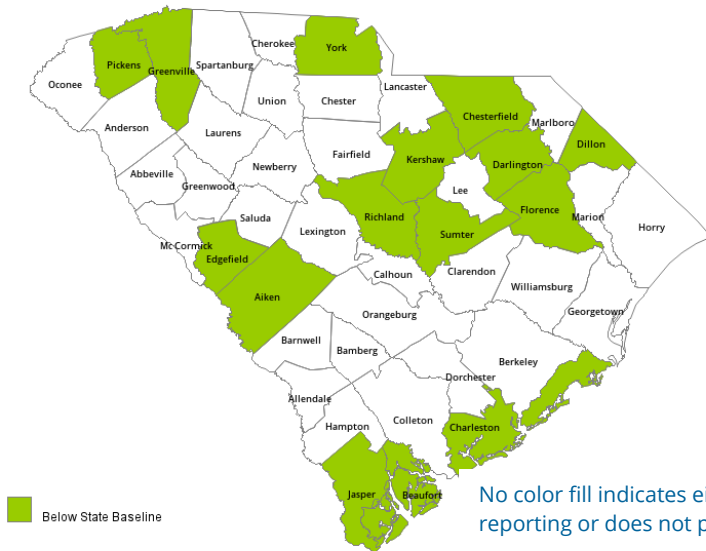

Reports were received from providers in **15** counties, representing all DHEC Public Health regions.

ILI percentage is dependent upon the number of reporting providers and/or can vary by disease activity or the number of providers submitting reports.

Percentage of Influenza-like Illness (ILI) Visits Reported by Sentinel Providers for Past and Current Seasons
