

Flu Watch

MMWR Week 38: September 16 to September 22, 2018

All data are provisional and subject to change as more reports are received.

Geographic Spread

South Carolina reported **sporadic activity** this week.

Influenza-Associated Hospitalizations and Deaths

This week **5** influenza-associated hospitalizations were reported by 26 hospitals. The cumulative hospitalization rate is **91.7** per 100,000. There were **0** laboratory-confirmed influenza-associated deaths reported this week. The cumulative mortality rate is **5.9** per 100,000. Compared to the previous week, the number of reported hospitalizations decreased by **3** (**37.5%**) and deaths **remained the same**. In the current flu season, there have been **4,549** influenza-associated hospitalizations and **292** influenza-associated deaths reported.

Virologic Surveillance

A total of **44** influenza cases (**43** positive rapid antigen detection tests; **1** lab-confirmed test) were reported from 15 counties representing all four DHEC Public Health regions. Influenza A was most frequently reported by clinical labs. Compared to the previous week, the number of reported influenza cases increased by **6** (**15.8%**) cases. In the current flu season, there have been **135,761** influenza cases (**132,166** positive rapid antigen detection tests; **3,595** lab-confirmed tests) reported.

ili

Influenza-Like Illness Surveillance

The percent of patient visits to sentinel providers for an influenza-like illness (ILI) was **1.04%**, which is **below** South Carolina's baseline (**3.13%**). Compared to the previous week, this is a **decrease** of **0.74%**.

The ILI activity level was minimal.

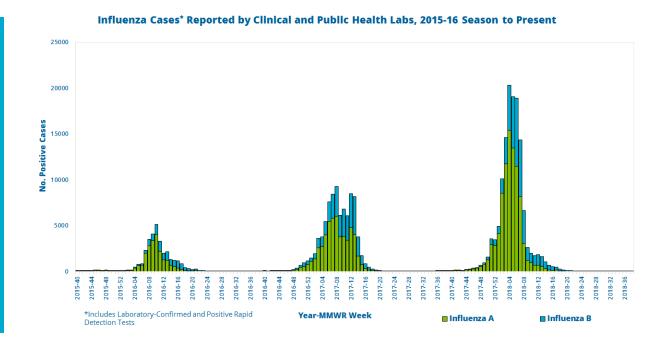

For national surveillance, please visit: https://www.cdc.gov/flu/weekly/

Virologic Surveillance

This week, **1** lab-confirmed case and **43** positive rapid influenza detection tests were reported by clinical labs.

Influenza A was most frequently reported by clinical labs.

Influenza Cases Reported by Public Health and Clinical Labs, This Week and Season Total

Map of Influenza Cases (n)* and Influenza Case Rate/100,000 By County For Week Ending 9/22/2018

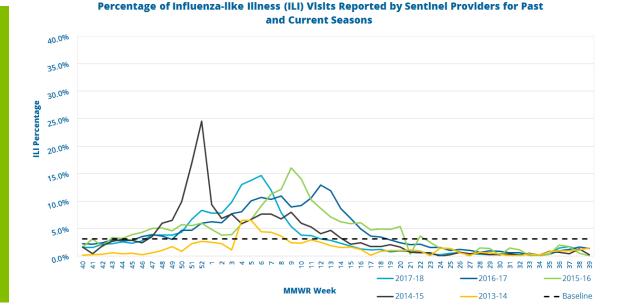

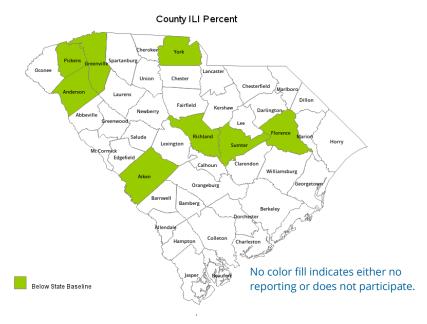

Influenza-Like Illness Surveillance

This week, the ILI activity level was **minimal** and **1.04%** of patient visits to SC ILINet providers was attributed to an influenza-like illness. This is **below** the state baseline, **3.13%**.

Reports were received from providers in 8 counties, representing 3 of the 4 DHEC Public Health regions.

ILI percentage is dependent upon the number of reporting providers and/or can vary by disease activity or the number of providers submitting reports.
