Virologic Surveillance

This week **409** lab-confirmed tests were reported. In the current flu season, there have been **50,364** lab-confirmed tests reported.

Influenza-Like Illness Surveillance

The percent of patient visits to sentinel providers for an influenza-like illness (ILI) was **2.9%**, which is **below** South Carolina's baseline (**3.6%**). The ILI activity level overall was **minimal**.

Influenza-Associated Hospitalizations

This week **47** influenza-associated hospitalizations were reported by **52** hospitals. The cumulative hospitalization rate is **56.9 per 100,000**. In the current flu season, there have been **2,888** influenza-associated hospitalizations.

Influenza-Associated Deaths

This week, **11** influenza-associated deaths were reported; however, **9** deaths occurred during previous weeks. The cumulative mortality rate is **2.0 per 100,000**. In the current flu season, there have been **103** influenza-associated deaths.

Virologic Surveillance

Lab-Confirmed Influenza Cases by Influenza Type to Date*					
Influenza Type	No. of Cases (%)				
	This Week	2022-23	2021-22	2020-21	5 season average

Influenza-Like Illness (ILI) Surveillance

This week, the ILI activity level was **minimal** and **2.9%** of patient visits to SC ILINet providers were attributed to an influenza-like illness. This is **below** the state baseline of **3.6%**.

Reports were received from providers in **22** counties, representing all DHEC Public Health regions.

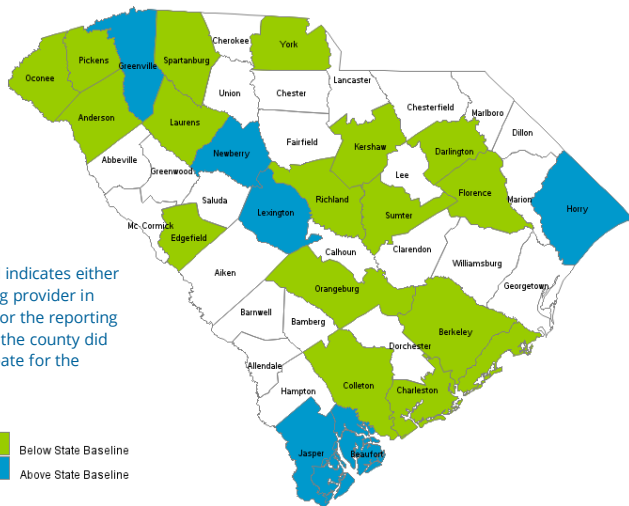

ILI percentage is dependent upon the number of reporting providers and/or can vary by disease activity or the number of providers submitting reports.
